

Denise Nelson has been an early childhood professional in the Erie area for more than 18 years. She holds a bachelor's degree in psychology from Millersville University, along with several certificates focusing on education and faith in the marketplace.

Her teaching style permits her students to absorb new concepts in their learning environment while demonstrating growth and development in social, cognitive, and motor skills.

Faith and family are added components of her profession as she also pastors alongside her husband of 38 years. She has three adult children and two grandchildren; and all are testaments to her legacy. She is excited that LCA is now part of her journey!
